TIARA 3900 SOVRAN

USING REVOLUTIONARY Volvo Penta IPS technology, Tiara Yachts has raised the bar on handling, noise control, fuel efficiency and interior space with its new 3900 Sovran.

Based on pulling, counter-rotating propellers, the new Volvo IPS system makes this boat faster, quieter and cleaner than many others in her size range. The IPS Joystick control comes standard, making docking easier than ever, even when maneuvering in strong wind and currents.

With a single movement of the joystick, you command the IPS propulsion units to respond in any direction. This gives you the power to maintain control of your 3900 Sovran, without the need for bow thrusters.

The interior of the boat is incredibly spacious, with a unique single-stateroom floor plan that's ideal for cruising. The forward master stateroom comes complete with a pedestal queen berth, abundant storage, hanging lockers and a flat-screen TV built right into the bulkhead. It's separated from the salon with curved teak sliding pocket doors.

Instead of dedicating valuable living space to a second stateroom for occasional guests, the Tiara 3900 Sovran puts it to use for features you can enjoy every day. Tiara's designers were able to open up the salon and increase the size of the adjacent head, which includes a full-frame door and a stall shower.

A sofa with a dinette table provides seating for four on the port side of the salon, which is open to the gal-

ley. Corian countertops, a two-burner ceramic cooktop, ample storage and top-notch teak joinery are just a few features in the fully equipped galley.

Aft to starboard, the salon steps down into a "theater" lounging area with comfortable seating and a large flat-screen LCD TV. The area can also convert to berths for overnight guests.

And with a large seating area and table on the aft deck and a sunpad on the bow, you'll enjoy the space outside just as much as the interior.

The length listed includes the standard pulpit and swim platform. The price listed includes twin 310 hp Volvo IPS 400 diesels with IPS Joystick control.

SPECIFICATIONS

- LOA** 41 ft., 9 in.
- Beam**..... 13 ft., 11 in.
- Draft** 3 ft., 5 in.
- Weight** 23,000 lbs.
- Fuel capacity** 300 gals.
- Water capacity** 102 gals.
- Price**..... \$469,900
